

萬德遊樂設備有限公司

Wande Play Facilities (HK) Limited

Wande Play specializes in manufacturing children playground facilities and outdoor fitness equipment. Wande Play Group was founded in 1986. In 2008, we have relocated our production plant from Shenzhen to Nanjing. Wande Play consolidates product development, project design, production, sales and marketing, installation and after sale service under one roof. Our Nanjing production plant occupies a floor area of 65,000 m².

Our product ranges include outdoor children play equipment, indoor soft play and adventure castle, outdoor fitness equipment, park and community leisure facilities, and safety surfaces. We also provide design and installation services for our customers. In order

to improve our product development expertise so as to be always at the forefront of the industry, we have established our own molding-workshop in 2001. Then we control the autonomy of product development under our roof which enriches substantially the "personality" of our products and increases the product development efficiency. The intelligence right of some of our products and technologies are protected by patents.

Starting from 2000, we have invested in different phases in equipping with testing instruments, jigs and fixtures, and so on. At the same time, we have set up our specialized after-sale-service team too. During this process, we have also applied and been awarded the ISO9001: 2000 certificate. We are proud of our incomparable performance, however, we will keep on improving. We will continuously adopt our management philosophy: "spread the happiness, create for future, step with the world, and develop Wandeplay brand"; strengthen our competitive edges of "scientific design, product characteristics, and multiple functions"; and insist on our commitment to service: "listen with care, measure in detail, design creatively, manufacture to standard, install with care, follow up closely"; and we will continue to work hard for breakthroughs in products and services!
